

INFRASTRUCTURE AS A SERVICE

MOVE YOUR INFRASTRUCTURE TO THE CLOUD

As Federal budgets and resources tighten, enterprise IT departments are looking to offload systems and costly infrastructure to an off-site solution which is secure, agile and highly available.

Expect More From Your IaaS Solution

Chief Technologies is a leader in delivering Infrastructure as a Service to the Public Sector. We provide a FISMA Secure, Private, Cloud Hosted IaaS solution that allows Federal Agencies to easily and securely extend their costly traditional infrastructure into a flexible and scalable managed cloud based service model.

Chief IaaS Features Include:

- ✓ Virtualized Compute, Storage and Networking
- ✓ Reduced Total Cost of Ownership
